

1) Village of Lake George (Warren County) - \$500,000

The project will provide waste water treatment replacement, to address an Order on Consent, protecting Lake George waters and reversing a moratorium impacting development and the tourism industry.

2) City of Auburn (Cayuga County) - \$500,000

The South Street Corridor Enhancement project will replace a 40-year-old water main along NYS Route 34, increasing capacity to the Harriet Tubman National Historical Park and businesses that support tourism development in Cayuga County.

3) Village of Rouses Point (Clinton County) - \$500,000

The project will create jobs by constructing a new road for multi-use development and securing land for water treatment facilities in Rouses Point, increasing capacity for industrial development and modernizing water treatment processes to improve water quality.

4) Clinton County - \$500,000

The project will upgrade transportation infrastructure (roads and bike lanes), stormwater, water and sewer mains for 30 developable acres and support over \$17M in private construction.

5) Orleans County IDA (Niagara and Orleans County) - \$480,000

The project involves the engineering and construction of improvements to nine railroad bridges and culverts on the Falls Road Railroad in Orleans and Niagara Counties in order to maintain rail service to customers and retain 225+ jobs.

6) Cornell Cooperative Extension (Jefferson, Lewis, Oswego, St. Lawrence Counties) - \$203,145  
Project partners will build food system capacity through the development of a food hub. Assistance will be provided for food safety, regulations, and market development, increasing agricultural revenue and jobs.

7) Washington County Sewer District #2 - \$500,000

Funding will assist with the relocation of a sewer line, storm water separation and water line replacement in a current CSO that experiences chronic overflows that negatively impacts area manufacturers.

8) Town of Wilmington (Essex County) - \$123,112

The project will acquire property within the town to construct a decentralized wastewater treatment system to attract new businesses and prevent existing businesses from closing due to septic system failures.

9) Town of Elizabethtown (Essex County) - \$250,000

The project will address infrastructure shortcomings such as the development of trail access, downtown connectivity, and information/education centers to reinforce ongoing efforts to make Elizabethtown a trail biking destination while helping to redistribute overuse in the High Peaks region.
